

Oral History,10-2-13

Setting up recorder for easy use and download directly to computer and then to internet.

I have settled on MP3 format for recordings which is very universal

Both PC and Mac can read it

I need to get bill for recorder to Elaine,

Setting up short PowerPoint based training course for interviewers

This will be prerequisite for checking out recorder

Robert has indicated that our student and friend are willing to transfer our 3 remaining cassettes to CD for minimal cost. While I am getting equipment to do this for my own personal use, it may be a month or 2 until that happens.

So Robert have at it - noting that MP3 is format we want. When CD's cut, get them to me and I will add to library of oral histories. Again, if this problem I will do transfer myself but a little later.
